General Public Comment - Not earlier than 2:00 PM

President Bridges called for General Public Comment.

Email from John Stenson:

A GOOD INVESTMENT CONSULTANT WILL KNOW NEXT YEAR WHY THE THINGS HE PREDICTED LAST YEAR DID'NT HAPPEN THIS YEAR.

YOUR INVESTMENT CONSULTANT PREDICTED THAT HEDGE FUNDS WOULD BE A GOOD INVESTMENT. "YOU SHOULD ASK HIM WHAT YEAR "

IN THE PAST 15 YEARS HEDGE FUNDS HAVE BEEN A BAD INVESTMENT, THATS WHY CALPERS ARE DIVESTING FROM HEDGE FUNDS.

WHEN IT COMES TO PUBLIC COMMENT YOU BOARD MEMBERS NEED TO START ANSWERING QUESTIONS. HOW CAN YOU KEEP OUR MEMBERS INFORMED ABOUT HOW YOU ARE INVESTING THEIR MONEY IF YOU DON'T ANSWER QUESTIONS?

SOME QUESTIONS I WOULD LIKE YOU TO ANSWER ARE. FIRST WHAT ARE THE NAMES OF YOUR HEDGE FUNDS?

SECOND WHAT ARE THE NET RETURNS ON YOUR HEDGE FUNDS FOR THE PAST THREE YEARS ENDING ON 30 JUNE 2020 ?

THIRD, HOW MUCH HAVE YOU PAID IN MANAGEMENT AND PERFORMANCE FEES ON YOUR HEDGE FUND INVESTMENTS?

WITH BEST REGARDS FROM JOHN STENSON. A 45 YEAR MEMBER OF SFERS

Retirement Board Minutes September 9, 2020 Page 8 of 16

The U.S. trade deficit widened (ended May) as the value of exports decreased by 4.4%.

The unemployment rate spiked up to 11.1% ended June, up from 4.4% in Q1; U-6, a broader measure of unemployment, increased to 18.0% in Q2 from 8.7% in Q1.

Rolling 12-month seasonally-adjusted CPI saw a down-tick to 0.71% in Q2 from 1.52% ended Q1; Capacity Utilization decreased to 68.6 in Q2 from 73.5% in Q1.

Fed Funds rate remains at a targeted range of 0.00% to 0.25%. The 10-year Treasury Yield (constant maturity) finished Q2 down to 0.7% from 0.9% in Q1. The Fed remains committed to continuing stimulative action as needed to support the US economy. The Fed's balance sheet continues to grow in wake of the pandemic.

Mr. Martin reported that, over the past five years, the Fund returned 7.25% per annum, ranking in the 2nd percentile of the Investment Metrics Public Funds > \$1 Billion net of fee universe. The Fund's return trailed the actuarial rate of 7.4%, and outperformed the policy index by 70 basis points. The Fund's volatility was 6.36%, which ranks in the 8th percentile of its peers over this period. The Fund's risk-adjusted performance, as measured by the Sharpe Ratio, ranks in the 1st percentile of its peers. He reported that assets increased from \$25.86 billion to \$26.02 billion in the one year ended June 30, 2020 with \$744.4 million in net distributions. The Fund returned 2.41%, outperforming the policy index by 77 basis points and ranking in the 32nd percentile of its peers.

The Board reviewed and discussed the material and engaged in a question and answer session with staff.

ITEM NOT USED

9. 090920-09 Discussion Item Leverage Education

Documents provided to the Retirement Board prior to the current meeting: Staff Memorandum, NEPC's Leverage Education Presentation

William Coaker, Chief Investment Officer; Anna Langs, Managing Director, Asset Allocation Risk Management, Innovative Solutions; Allan Martin and Christopher Levell, NEPC presented an oral and written report on this item.

NEPC's presentation introduced Total Portfolio Level leverage and its benefits in reaching more efficient capital allocation. NEPC discussed examples and lessons learned from other public pension plans including State of Wisconsin Investment Board, SWIB. Their presentation addressed risks, costs, possible implementations, and challenges.

NEPC estimated the impact of a modest 5% Total Portfolio Level leverage to SFERS under two different implementations:

- 1) Naïve 68% MSCI ACWI / 32% U.S. Intermediate Treasuries replication using futures. Over the period of 10 years ending 03/31/2020 naïve 5% leverage would have added 45bps of volatility and improved annual performance by 20bps or 4% and \$513 million cumulatively.
- 2) Using GTAA manager universe average discussed at the July Investment Committee. Over the period of 10 years ending 03/31/2020 GTAA 5% leverage would have no impact on volatility and improved annual performance by 38bps or 7.8% and \$950 million cumulatively.

Staff reported that it is planning to bring an updated Asset Allocation Recommendation to the Retirement Board at its November 2020 Board meeting. Staff is evaluating leverage at the portfolio level as part of their Asset Allocation recommendation.

Staff reported that SFERS does not currently utilize leverage at the Total Portfolio Level. Staff reported that SFERS does have leverage throughout their portfolio:

- 1. Investment in a publicly traded company that issued debt leverage is routinely used by public equity companies. Staff reported that the average debt-to-equity ratio of companies in the S&P 500 is currently about 85%.
- 2. Investment with a Long/Short Equity manager Staff reported that several of SFERS public equity managers utilize long-extension strategies.
- 3. Managers' use of credit facilities Staff reported that most Private Equity, Real Assets, and Private Credit funds, fund of funds, and separately managed accounts use leverage in the form of credit facilities to improve liquidity and boost returns.

Retirement Board Minutes September 9, 2020 Page 10 of 16

4. Absolute Returns managers use leverage to control risk – Staff reported that managers in SFERS' Absolute Return strategies utilize leverage through the derivates market to improve returns but also to manage risk and protect capital. Absolute Return managers protect capital by maintaining a low net exposure.

Staff and NEPC reported that they are evaluating leverage at the Total Portfolio level for the following reasons:

- 1 Leverage Allows SFERS to Own More of What It Likes Earning higher returns through efficiently leveraging public market assets allows the overall plan to invest more in Private Markets and Active Public Market managers, both areas of demonstrated alpha for SFERS.
- 2 Leverage Can Boost SFERS Returns since Borrowing Costs Are Very Low In financial management, it makes sense to be a lender when interest rates are high and to be a borrower when they are low. In the past decade, many corporations have increased their borrowing, because interest rates are at historic lows and because they expect to increase their profits by investing the proceeds in projects at a higher return than the cost of borrowing.
- 3 Leverage is Optimal from the Perspective of the Efficient Frontier Leverage can also be more efficient by earning higher returns per unit of risk than a long-only portfolio.
- 4 Leverage Provides a Greater Benefit to SFERS Compared to Other Asset Allocation Options Leverage allows for great flexibility in liquidity management. Staff reported that SFERS will soon experience a large increase in cash outflows for pension payments cash outflows are projected to increase from \$549 million in FY 2019-20 to \$914 million by 2025 and to \$1,314 million in 2030, a 2.4x increase in the next ten years.

Staff reported that Staff and NEPC will present Strategic Asset Allocation options with and without total plan leverage at the October 21, 2020 Investment Committee.

The Board reviewed and discussed the material and engaged in a question and answer session with staff.

10. 090920-10 Discussion Item Annual Review of the Securities Lending Program for Fiscal Year End June 30, 2020

Documents provided to the Retirement Board prior to the current meeting: Staff Memorandum, Annual Review of the Securities Lending Program for the Fiscal Year Ending June 30th, 2020

William Coaker, Chief Investment Officer; Anna Langs, Managing Director, Asset Allocation Risk Management, Innovative Solutions; Michael McInnes, BNY Mellon, presented an oral and written report on this item.

Retirement Board Minutes September 9, 2020 Page 12 of 16

In February 2020, SFERS reinstated a securities lending program with BNY Mellon. Staff and BNY Mellon reported that, at the time of the recommendation, SFERS had approximately \$7.0 billion of lendable assets, 19% of which were expected to be lent generating estimated net annual revenue to SFERS of approximately \$2.3 million. BNY Mellon reported that Securities Lending revenues from inception (February 2020 through June 2020 are ahead of initial estimates at \$1.5 million. They reported that utilization is in line with initial estimates at 20%.

The Board reviewed and discussed the material and engaged in a question and answer session with staff.

12. 090920-12 Discussion Item Chief Investment Officer Report

Documents provided to the Retirement Board prior to the current meeting: CIO Report

William Coaker, Chief Investment Officer, presented an oral and written report on this item.

CIO Coaker reported that, as of June 30, 2020, final Fiscal Year 2019-2020 Returns were 2.41%; 3-year annualized returns were 7.17%; 5-year annualized returns were 7.25%; 10-year annualized returns were 9.39%; 15-year annualized returns were 7.12%; 20-year annualized returns were 6.05%; and 30-year annualized returns were 8.56%.

CIO Coaker reported that, from February 20th to March 23rd, stocks experienced a stunning decline of -35%, yet SFERS still finished the year with positive returns. Despite the shocking plunge earlier this year, Public Equity finished the fiscal year as SFERS' best performing asset class, gaining 7.90% and strongly outperforming its benchmark, the MSCI ACWI, which returned 1.17%. Mr. Coaker reported that Private Equity was SFERS' second-best performing asset class, gaining 6.04% for the fiscal year. SFERS Fixed Income portfolio finished the year with a gain 4.28%. Private Credit edged down -0.05% for the fiscal year, while Absolute Return lost -3.21% and the SFERS Real Assets portfolio declined -5.57%.

CIO Coaker reported that, within asset classes, SFERS overweights to the U.S., China, Technology and Health Care plus strong selection by external managers enabled SFERS' Public Equity portfolio to post positive returns of 7.90% and outperform its benchmark by a robust 6.73%. He reported that those same tilts plus strong manager selection enabled SFERS Private Equity portfolio to record a gain of 6.04%. He reported that Fixed Income posted strong returns from its Treasury allocation of 7.17% but was hurt by negative returns in its credit sensitive holdings. He reported that Private Credit was hampered by markdowns of credits to reflect equivalents in publicly traded bonds; however, SFERS expects to recover most of those markdowns over time. CIO Coaker reported that Absolute Return incurred a painful loss in March on its mortgage and structured credit portfolios; however, since March,

Retirement Board Minutes September 9, 2020 Page 13 of 16

those positions have recouped more than half their decline, and Staff expects further recovery ahead. He reported that Real Estate holdings held up well, but SFERS' allocation to Natural Resources suffered badly. The COVID-19 human health crisis has had arguably its greatest impact on demand for oil and a recovery in demand for oil depends largely on an economic recovery.
